

The **Geobrugg pit wall** is designed as mobile pit wall allowing fast and easy installation as well as the possibility to extend for future requirements.

Geobrugg Pit Wall

FLEXIBLE SOLUTIONS IN
MOTORSPORTS

THE FLEXIBLE SOLUTION FOR PERMANENT AND TEMPORARY PIT WALLS.

The Geobrugg pit wall is consisting of **NORDBETON pit wall concrete barriers** as and the **Geobrugg pit wall panels**. Ready prepared connection elements and sleeves in the NORDBETON pit wall allow a fast and easy installation.

Depending on the race series hosted the platform of the NORDBETON pit wall concrete barrier will be adjusted to cater your needs. As a rule of thumb around 2 m of platform are required to host a Formula 1 race whereas 1.5 m is sufficient to host most other race series. Optional gates for cars or track workers are easily fixed to the NORDBETON pit wall barrier.

Fast and quick installation of pit wall concrete barriers and fast installation of pit wall panels.

Optional gates for cars and track workers. Access to the race circuit is often crucial. Only with reliable designed gates you are able to guarantee a fast access as well as the right level of protection in case of an impact.

Adjustment of pit wall barrier Whether you have a single or multiple cable channels, need a special connection slot a manhole or any other design adjustments please let us know. The NORDBETON pit wall concrete barriers are designed in accordance to your specifications and requirements.

The Geobrugg pit wall provides the following features:

High-tensile steel wire net

The mesh made out of high-tensile steel wire with a tensile strength of $\geq 1,770$ N/mm², enables maximum energy absorption with minimum deformation.

Design expertise

Rely on our expertise of designing proven and reliable solutions.

FIA accepted

Our barriers are installed at FIA and FIM homologated circuits around the world.

Modular

The modular pit wall allows to adjust to your future needs. Additional elements and/or gates can be easily connected and the pit wall extended.
