

RED BULL RING II, ÖSTERREICH

Rennstrecken / Teststrecken

Red Bull Ring II

Rennstrecken / Teststrecken

Projekt	Red Bull Ring II
Ort	Spielberg
Land	Österreich
Installationsjahr	2014
Kunde	n/a
Planer	Gebrugg AG
Weitere Unternehmen	Zaunbau Nähr GmbH Austria
Ausgangslage	<p>The debris fence of Gebrugg was selected to protect the infield and the new spectator area where temporary grandstands will be erected for the race.</p>
Massnahme	<p>Gebrugg offered the complete turnkey solution including layout design, manufacturing and installation of close to 400 m of our debris fence. With the selection of the FIA debris fence and the adaptation of the system to the local conditions the client made sure that the spectators are protected with the highest standard available.</p> <p>Key advantages of the system are:</p> <ul style="list-style-type: none">- Tested and designed system- Fast and easy installation- 50 cm cable spacing- Improved spectator protection due to high-tensile wire mesh ROMBO- Improved spectator vision compared to systems with 25 cm cable spacing
Systemhöhe	3.5 m
Systemlänge	400 m
