The **Geobrugg marshal post** is designed to protect marshals and track workers around the circuit. Its unique design offers a very good level of protection whilst maintaining the flexibility of moving the marshal post around your circuit for different configurations.

**Geobrugg Marshal Post**

**PROTECT YOUR TRACK MARSHALS AND WORKERS**
GEOBRUGG MARSHAL POST – THE FLEXIBLE SOLUTION FOR YOUR RACE TRACK.

The **marshal post** consists of one solid **NORDBETON concrete base** with special Geobrugg marshal post debris fence panels. The track side facing panel has two openings for marshals allowing flag operations or a fast response in case of an accident.

As a stand-alone solution the marshal post can be installed free standing or behind a guardrail. For the free standing solution make sure the marshal post is protected additionally with tire six packs.

The Geobrugg marshal post provides the following features:

- **High-tensile steel wire net**
  The mesh made out of high-tensile steel wire with a tensile strength of >= 1,770 N/mm2, enables maximum energy absorption with minimum deformation.

- **FIA accepted**
  Our barriers are installed at FIA and FIM homologated circuits around the world.

- **Rapid installation**
  Our solutions are based on a plug and play principle. Installation manuals or movies make it easy to do the installation.

- **Relocatable**
  Our design enables to easy relocate the marshal post in case of circuit modifications.
