

TECHNICAL DATA SHEET

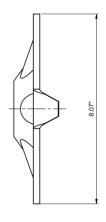

Spike plate P33/40 N and P33/50 N for high-tensile steel wire mesh TECCO® / SPIDER®

Spike plate P33	
Length:	13 in
Width:	8.07 in
Thickness:	0.25 in
Hole diameter:	1.58 in (40 mm) 1.97 in (50 mm)
Length of the spikes:	min. 0.75 in
Weight:	4.22 lbs (40 mm) 4.00 lbs (50 mm)
Geometry:	diamond
Longitudinal bending resistance:	≥ 170 lb-ft

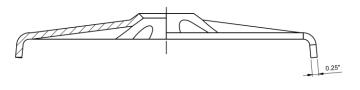

Spike plate P33 Steel	
Material:	ASTM 1018 (A572/SA572 GR 50) ASME A656/SA656 GR 50 Type 7

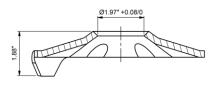

Spike plate P33 corrosion protection	
Corrosion protection:	hot-dip galvanized per ASTM A123
Layer thickness in average:	85 µm

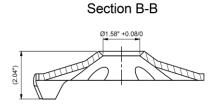

Section B-B

Rockfall, slides, mudflows and avalanches are natural events and therefore cannot be calculated. This is why it is impossible to determine or guarantee absolute safety for persons and property with scientific methods. This means that to provide the protection we strive for, it is imperative to maintain and service protective systems regularly and appropriately. Moreover, the degree of protection can be diminished by events that exceed the absorption capacity of the system as calculated to good engineering practice, failure to use original parts or corrosion (i.e., from environmental pollution or other outside influences).
