

TONWERKE KELLER AG AERIAL CABLEWAY SAFETY NET, SWITZERLAND

Impact Protection

Tonwerke Keller AG aerial cableway safety net

Impact Protection

Project	Tonwerke Keller AG aerial cableway safety net
Location	Frick
Country	Switzerland
Year of installation	2009
Initial situation	The company transports clay by an aerial cableway over the railway track and a street. To secure these traffic routes in case of a failure, a reliable measure is necessary.
Description	Geobrugg installed a mesh construction with ROMBO. Due to its high loading capacity it provides the safe solution.
Protected object	Infrastructure
