# Bikernieku Trase - upgrade

## Tory wyścigowe

Projekt	Bikernieku Trase - upgrade
Lokalizacja	Rīga
Kraj	Łotwa
Rok Instalacji / montazu	2015
Inwestor	CBF SIA Binders
Projektant	Geobrugg AG

Opis sytuacyjny projektu	Bikernieku Trase is one of the oldest Soviet Race Circuits existing - close to 50 years in age. It was required to start the upgrading process. In a first step the asphalt, barriers and run-off areas had to be upgraded.
--------------------------	---

Opis zastosowanego rozwiązania	<p>Geobrugg was involved in the upgrade design consulting local architects and the race circuit director on different barrier types and run-off areas.</p> <p>After the project award Geobrugg supplied the debris fence panels for the mobile Debris Fence and provided NORDBETON moulds to produce locally the concrete barriers.</p> <p>NORDBETON and Geobrugg conducted local training sessions in order to enable the local team to produce, install and repair the motorsport barriers independently.</p> <p>After completion of the installation and final inspection a certificate of completion and compliance was provided.</p>
--------------------------------	---

Wysokosc ochronna systemu	3.5 m
Dlugosc systemu	400 m
