Bikernieku Trase - upgrade

Piste de concurs

Proiect	Bikernieku Trase - upgrade
Loc	Rīga
Țară	Letonia
Anul instalării	2015
Client	CBF SIA Binders
Tehnologie	Geobrugg AG
Situația inițială	<p>Bikernieku Trase is one of the oldest Soviet Race Circuits existing - close to 50 years in age. It was required to start the upgrading process. In a first step the asphalt, barriers and run-off areas had to be upgraded.</p>
Descriere	<p>Geobrugg was involved in the upgrade design consulting local architects and the race circuit director on different barrier types and run-off areas.</p> <p>After the project award Geobrugg supplied the debris fence panels for the mobile Debris Fence and provided NORDBETON moulds to produce locally the concrete barriers.</p> <p>NORDBETON and Geobrugg conducted local training sessions in order to enable the local team to produce, install and repair the motorsport barriers independently.</p> <p>After completion of the installation and final inspection a certificate of completion and compliance was provided.</p>
Înălțime sistem	3.5 m
Lungime sistem	400 m
