

# CIRCUIT OF THE AMERICAS, США

Гоночные трассы

# Circuit of The Americas

## Гоночные трассы

Проект	Circuit of The Americas
Место	Austin, Texas
Страна	США
Год установки	2012
Клиент	Global Fence and Gate, Circuit of the Americas
Проектировщик	Geobruigg

**Ситуация**

In 2012 the new Grand Prix race track [Circuit of The Americas](#) in Austin, Texas, had to be equipped with a debris fence. A very tight schedule for design, production, and installation required the closest cooperation between all parties involved in the planning, approval, and installation. Within only six months, Geobruigg completed the design and delivery of materials required for the installation on site.

**Описание**

The F.I.A. approved debris fence introduced a cable spacing of 50 cm in a Grade 1 installation for the first time. Due to our high tensile wire mesh, larger cable spacing became possible. These cables achieved a faster installation speed. Geobruigg completed the construction layout design, manufactured and supplied all materials on-site, and trained the local contractor to install the debris fence.

Другие конструкции	Гоночные трассы
Высота системы	2.5м, 3.5м
Длина системы	9300 m
