

# GAMSGRUBENWEG, GROSSGLOCKNER, AVUSTURYA 201

Kaya düşmesine karşı koruma

# Gamsgrubenweg, Grossglockner

## Kaya düşmesine karşı koruma

Proje	Gamsgrubenweg, Grossglockner
Yer	Grossglockner
Ülke	Avusturya
Kurulum Yılı	2013
Müşteri	Grossglockner Hochalpenstrassen AG
Mühendislik	Ingenieurbüro Tschernutter Consulting GmbH
Yüklenici	Felbermayr Bau GmbH
Durum	To protect from rockfall on an alpine trail at the mountain Grossglockner in Austria, a new rockfall gallery was built between two tunnels.
Açıklama	The damping system ROCKFALL-X G was used on top of the gallery to economically dampen rockfall impacts with a calculated energy of up to 800 kJ. For this purpose 85 bags of the 1.3 m high damping modules were prepared in Geobrugg factory and delivered directly to the construction site.
Gösterilen obje	Road
Korozyon koruma	GEOBRUGG SUPERCOATING
Enerji emme kapasitesi	1000 kJ
Sistem boyu	1.0 m, 1.5 m
