2012

Atlanta Motorsports Park
Geobruigg AG

During the initial construction of the facility, [Atlanta Motorsports Park](#) decided to protect its spectators and marshals with the best system available.

Our FIA debris fence was installed at key locations on the track including around its signature turn (Turn 4 - modelled on The Carousel turn at the Nürburgring, Germany) and along pit road. The lay-out was custom designed to fit these locations, and was adapted to the different conditions present at each location on the track.
