Rudskogen Motorsenter  
Rakkestad

/

2012

Rakkestad Motorpark AS  
Geobruigg AG, Circuit design: Tilke GmbH & Co. KG

The [Rudskogen Motorsenter](#) is Norway's oldest asphalt race circuit. After becoming the national motorsport facility of Norway in 2006 the circuit is undergoing significant development with a new circuit design by Hermann Tilke.

The first part of the FIA debris fence installation was realized with the support of Geobruigg supervising the design of the debris fence as well as the delivery of key elements such as:

- FIA approved high-tensile wire mesh ROMBO G80/4
  - HELIX spring fixation
  - Cables every 50 cm incl. hardware such as stretcher, cable clips and shackles
- The delivery and installation took place in July /August 2012. The installation was made with personnel of the Rudskogen Motorsenter. Once more the clear structured design, delivery and installation manual proved very helpful during installation.
