Isle of Man Government
Geobruigg Safety Solutions

Geobruigg Motorsport Barriers were selected to protect the historic scoreboard along the Isle of Man TT race.

Our mobile Geobruigg Panelized Debris Fence is ideally suited for temporary usage along city race circuits such as the TT race and offers highest spectator protection. Geobruigg Safety Solutions did provide the material required for installation as well as did installation supervision services to train the local installation crew. The Isle of Man Government was happy with the installation and is considering using Geobruigg Motorsport Barriers again for a different location.
